

Fayed Air Force Base

<p>LOCATION</p> <p>Egypt</p> <p>CLIENT</p> <p>Bechtel</p> <p>COST</p> <p>USD 20mm</p> <p>REPRESENTATIVE SERVICE</p> <p>Management personnel and suitable engineering staff</p>	<p>Bechtel was contracted by the Egyptian government to construct a state of the art air base out of the WWII relic once inhabited by the British Royal Air Force.</p> <p>FSC was tasked with a very difficult job. Bechtel had tried for a year and couldn't find the right type of engineers for this kind of project. FSC did, and they even found them locally in Egypt.</p> <p>Suitable people would combine the requisite skill set with the cultural knowledge and sensibilities needed to function well in this region, as well as</p>	<p>the ability to pass the necessary background checks to meet the security demands of the client.</p> <p>This project is a perfect example of the unquantifiable value FSC brings. More than a company, a global community of people who can coordinate on a moments' notice.</p>
