USD 250mm

## REPRESENTATIVE SERVICES

Production work for  
Construction  
Documents

BBB is a global hallmark of design excellence. Specializing in renewal, urban design, historic, and ecologically sensitive projects, they bring over 40 years of experience to each project.

When they were tasked with designing the addition to the glamorous Mirage Hotel and Casino (home to landmarks such as the iconic erupting volcano, and 1 OAK nightclub), FSC came along to provide production work towards the completion of construction documents.

The project involved the addition of two wings to the existing structure, resulting in drastic revisions to the entire property.

The result is a facility that brings stiff competition to the hospitality industry of Las Vegas.

FSC performed this work in-house, in contrast to many projects which are performed on-site in collaboration with the client.

A project of this scale clearly illustrates that FSC is capable of servicing any size project, to the demands of any requirement the client may have.

FSC is proud to have played such a key role in the modernization of this highly visible Las Vegas landmark.
