

USAID Microwave System

LOCATION

Cairo and Alexandria,
Egypt

FSC was privileged to join the United States Agency for International Development (USAID), and Bechtel on a major telecom and infrastructure project in Egypt.

The project was successful and the client was able to achieve target cost and delivery.

CLIENT

Raytheon

This project presented a number of challenges, primarily that of gathering a local, regional, and expat workforce in a relatively unfamiliar environment, and creating on-the-job synthesis.

COST

USD 3B

REPRESENTATIVE SERVICE

Provided management staff and all A/E disciplines

As FSC has vast experience in a variety of global regions, particularly the Middle East, it was able to leverage its' global community of A/E talent for the select few with very specific traits and skills.

The end result was the construction of a microwave system for all telephone exchanges for northeast Egypt.
